Request the following test and
certificate issuance

nissenken-HP.1210_2

Contents inside the bold frame must be filled out. In addition, if the billing address or sample return address is different, please note that in the remarks column.

Product Name • Product No. • Color No.	Fiber contents	Number of samples	Return test sample	Number of copies (report)	
			Yes	English	
			No	Japanese	
				Chinese	
c/#		Note: (handling precautions etc. of the sample)			

※Please fill in the above information in the same language as you are requesting in the "number of copies" section (Including company name)

Testing items	Testing standard	Number of samples	Testing fee
Certain aromatic amines (Azo test)	GB		
	Oeko-Tex standard 100		
	EN 14362		
	Japan Textile Federation		
Testing fee	■10,000 yen unless the material is dispersed dye (cotton, linen, wool, silk, rayon, etc.). ■For JIS L1940:2014, 15,000 yen if the material is dispersed dye (polyester, acetate, etc.), leather, dye and unknown. ■For JIS L1940:2019, 25,000 yen if the material is dispersed dye (polyester, acetate, etc.), leather, dye and unknown. ■Quantity discount: 10 percent for over 5 samples and 20 percent for over 10 samples.		

Notes

If requesting for a final product, please inform us of the parts to be tested.

■If it is the same material (product color differences), up to 3 colors can be mixed and tested at the cost of 1 sample. However, if a specific Aromatic Amine is detected more than 1/3 (for 3 mixed samples) of the standard value, a retest is required.

■Even when a 4-aminoazobenene test (a test that requires confirmation in 2 stages depending on the detected components) is required, there is no additional costs.

■When a certain amount is detected, it will incur a cost as a separate confirmation test.

■The required sample amount is about 10g.

■The delivery time is usually 5 business days. Aside from that, it is possible to correspond from 2 business days as an
