Standard	GB/T 9994-2018 "Conventional moisture regains of textile materials"		
Content Changes	Revision, addition and deletion of conventional moisture regains		
Date of issue	15 th . Mar. 2018	Effective Date	1 st . Oct. 2018

"Conventional moisture regains of textile materials" in Chinese National Standard has been revised. Main revised contents are as follows.

1. Revision of conventional moisture regains about 5 kinds of textile materials.

Name	2018 edition (%)	2008 edition (%)
Cotton Fabric	8.5	8.0
Wool (woven)	15.0	14.0
Modal	13.0	11.0
Lyocell	13.0	10.0
Aramid 1313	5.0	-
Aramid 1414 (High modulus)	3.5	Aramid 1414 (High modulus) : 3.5
Aramid 1414 (Others)	7.0	Aramid 1414 (Normal) : 7.0

2. Addition of conventional moisture regains about 8 kinds of textile materials.

Name	Conventional moisture regains (%)
Chitosan Fibre	17.5
Polyester (Polytrimethylene Terephthalate : PTT)	0.4
Polyester (Polybutylene Terephthalate : PBT)	0.4
Ultra High Molecular Weight Polyethylene (UHMWPE)	0.0
Polyolefin Elastomer Fibre	0.0
Polyphenylene Sulfide Fibre (PPS)	0.1
Polyimide Fibre	1.5
Carbon Fibre	0.0

3. The name of "Blended yarn product" has been changed to "Multi-element product", and its note has been deleted.

4. Fluorocarbon fibre and its conventional moisture regains have been deleted.
